

# Chips Answer Back

S&P 500 +0.74% to 7,538 as the semiconductor complex recovers last week's give-back. Dow closes above 53,000 for the first time. ISM services holds at 54. Growth +2.41%.

## THE SESSION

The question the long weekend left open — whether last week's chip give-back was a rotation or the start of something wider — got its answer within the first hour of the reopen, and the answer was rotation. The semiconductor complex that had absorbed two sessions of concentrated selling before the holiday caught a broad, well-sponsored bid from the opening bell. The Nasdaq rose 1.13% to 26,125, the S&P 500 added 0.74% to close at 7,538.34, and the Dow gained 0.29% to finish above 53,000 for the first time. The VIX eased to 15.67.

The recovery had names attached to it. Goldman Sachs raised its AMD target to \$640 from \$450, explicitly treating last week's pullback as an entry rather than a warning, and Cantor Fitzgerald went further to \$700 — the highest target on the Street. Foxconn's stronger-than-expected quarterly sales over the weekend gave the AI-demand thesis a fresh data point, Nvidia said its roadmap is intact after a server-delay report rattled Asia overnight, and Samsung's Tuesday earnings now stand as the next proof point for the memory complex. The bid was not indiscriminate: homebuilders, retail, and parts of healthcare lagged as money moved back toward the cohort it had abandoned Wednesday and Thursday.

The macro tape cooperated quietly. The June ISM Services index printed 54.0 — a 24th straight month of expansion, with the employment component back above 50 for the first time in four months and the prices index at its lowest reading since February as fuel costs work their way back down. That combination — steady activity, firming services employment after Thursday's soft payrolls print, cooling price pressure — is about as agreeable a first hard-data read as the reopen could have asked for ahead of Wednesday's FOMC minutes, the first from a Warsh-chaired meeting. Oil kept drifting: OPEC+ approved a fifth consecutive

monthly output increase for August on Sunday, roughly 188,000 barrels per day, and WTI held near \$68 as the Hormuz premium continues to unwind. Energy was the day's soft spot, and the funeral of Ayatollah Khamenei proceeded in Tehran with technical talks in Doha set to resume around July 11.

The digital sleeve extended its early-July repair. Bitcoin held near \$63,500, spot Bitcoin ETFs have now snapped their long outflow streak, and both sleeve positions posted strong sessions alongside the crypto-adjacent equities.

***IOWN Tactical: No S&P 500 trim or buy thresholds are in play. The index sits near its highs, and the week's rotation round-trip — out of chips Thursday, back in Monday — is exactly the kind of noise the framework is built to ignore. Both sleeves are well ahead of their benchmarks at the year's midpoint.***

## IOWN HOLDINGS: NOTABLE MOVERS

### WINNERS

**AMD +6.61%** GROWTH PORTFOLIO

Closed at \$552.05, recovering most of last week's slide. Goldman Sachs lifted its target to \$640 from \$450 and Cantor Fitzgerald set a Street-high \$700, both framing the pullback as opportunity ahead of the July 23 Advancing AI event and August 4 earnings.

**HUT +6.84%** GROWTH PORTFOLIO

Closed at \$103.78, leading the miners' rebound as Bitcoin steadied and the sleeve's most beaten-down cohort caught a relief bid; MARA rose 4.44% in sympathy.

**QCOM +5.80%** DIVIDEND STRATEGY

Closed at \$186.48. Benchmark reiterated its Buy and Street-high \$300 target after a fireside chat with investor relations reinforced the data-center opportunity, and reports place the company in advanced talks to acquire AI software firm Modular for roughly \$4 billion.

**PCAR +5.36%** DIVIDEND STRATEGY

Closed at \$125.91, the strongest Dividend Strategy session in weeks as industrial cyclicals firmed into the July 28 Q2 report, where full-year EPS is expected to grow double digits on improving freight conditions.

**TSM +4.06%** GROWTH PORTFOLIO

Closed at \$451.79, recovering Thursday's decline as Foxconn's strong quarterly sales reaffirmed AI hardware demand across the Taiwan supply chain ahead of Samsung's Tuesday print.

**FTNT +3.90%** GROWTH PORTFOLIO

Closed at \$162.35 as cybersecurity participated fully in the tech bid, reclaiming most of last week's drawdown.

**ETHA +5.37%** DIGITAL ASSET ETF

Closed at \$13.55, its third strong session in four as Ether continued to outpace Bitcoin off the late-June lows.

**IBIT +3.58%**

DIGITAL ASSET ETF

Closed at \$36.12. Spot Bitcoin ETFs snapped a ten-day outflow streak late last week with their largest daily inflow in two months, and the sleeve's recovery continued into the reopen.

**DECLINERS**
**GPC -2.95%**

DIVIDEND STRATEGY

Closed at \$128.66, giving back a portion of Thursday's 12.92% surge on the reported O'Reilly bid for the NAPA unit. The strategic setup is unchanged: sale, spinoff, or competitive tension, with Q2 results July 21.

**BKH -2.21%**

DIVIDEND STRATEGY

Closed at \$72.16 as utilities gave back part of Thursday's defensive bid; ATO (-1.72%) and NEE (-1.02%) moved with the group.

**CL -1.83%**

DIVIDEND STRATEGY

Closed at \$93.39 as staples were a funding source for the rotation back into technology; CHD fell 1.17% alongside.

**LMT -1.45%**

DIVIDEND STRATEGY

Closed at \$538.00, a routine acquirer's dip as the company confirmed its \$3.5 billion agreement to acquire naval-defense firm Ultra Maritime, extending the anti-submarine warfare franchise.

**TOL -1.28%**

GROWTH PORTFOLIO

Closed at \$155.13 as homebuilders lagged the tape; the group was among the day's clearest laggards while money rotated toward semiconductors.

**HOLDINGS NEWS**

Lockheed Martin confirmed its \$3.5 billion acquisition of Ultra Maritime, the naval-defense specialist in anti-submarine sonar buoys and torpedo-detection systems, tracking toward roughly \$784 million in 2026 revenue. The deal deepens the undersea franchise at a moment when maritime security commands a premium, and it is the company's most significant corporate action of the year.

Qualcomm is reported to be in advanced talks to acquire Modular, an AI infrastructure software company, for roughly \$4 billion — a software layer on top of the data-center silicon push that management outlined at its investor day, with fiscal 2027 data-center targets that analysts increasingly treat as supported by actual purchase commitments.

Analog Devices received a higher price target tied to accelerating AI chip demand, closing up 3.09% at \$388.83, and Susquehanna lifted its target on Lam Research, which finished roughly flat after leading the pre-market. Vistra set its Q2 report for August 7.
