

Records, Narrowly

S&P +0.27% to a record close; Nasdaq tops 27,000. Nvidia's new PC superchip lifts the AI complex and pressures QCOM. ISM Manufacturing prints a four-year high at 54.0.

THE SESSION

June opened where May left off — at record highs, but the gain was narrow. The S&P 500 added 0.27% to close at 7,600.25, and the Nasdaq rose 0.42% to 27,086.81, its first close above 27,000. The advance, though, was concentrated: the Dow eked out 0.09% and the Russell 2000 slipped 0.47%, with breadth thin beneath the index prints. This was a tape carried by a handful of names rather than the whole field.

The catalyst was Nvidia. At Computex in Taipei, the company unveiled the RTX Spark PC superchip — a Windows-on-Arm processor set to ship this fall in machines from Dell, HP, Lenovo and others — and confirmed its next-generation data-center silicon had entered full production. NVDA closed up 6.26%, with Dell and HP both higher by double digits. The same news cut the other way for one of our holdings, a point we take up below.

The morning's open question was whether the data would confirm the reacceleration that Friday's regional surveys hinted at. It did. ISM Manufacturing printed 54.0 for May, a four-year high, above the 53.0 consensus and up from 52.7, with new orders climbing to 56.8 — a fifth straight month of expansion, anchored by AI-related capital spending. That keeps the "hot growth" read intact and reinforces the market's expectation of no rate change at the June 16–17 FOMC, with the Fed blackout beginning June 6.

Underneath, the cross-currents were familiar. Volatility ticked up modestly — the VIX rose to 16.05 — while gold eased 1.74% to \$4,513 and Bitcoin fell 2.86% to \$71,486. Oil stayed firm as the Strait of Hormuz disruption kept supply tight and May U.S. crude exports ran at records; the proposed U.S.-Iran framework remained pending into the close, with markets leaning toward the peace-hope side of the ledger. Energy and the AI complex did the lifting; defensives and rate-sensitives lagged.

IOWN Tactical: A record close on thin breadth is exactly the tape that rewards discipline over enthusiasm. With the index extended well above its long-term trend, our framework favors

building cash patiently, not chasing the move. We own businesses, not the index — and on days like this the distinction is the whole point.

IOWN HOLDINGS: NOTABLE MOVERS

WINNERS

MRVL +7.04% GROWTH PORTFOLIO

Custom AI-silicon demand carried Marvell to a fresh high; the stock has more than doubled this year as hyperscalers diversify their accelerator supply away from a single vendor.

FTNT +6.65% GROWTH PORTFOLIO

Fortinet pushed to its best levels of the year as cybersecurity demand and constructive technicals drew buyers into the close.

NVDA +6.26% GROWTH PORTFOLIO

The RTX Spark PC superchip launch at Computex, plus confirmation that next-gen data-center chips are in full production, drove the move.

ADP +5.36% DIVIDEND STRATEGY

Automatic Data Processing led the income sleeve ahead of Wednesday's ADP private-payrolls report, a steady compounder bid in a thin tape.

TSM +4.11% GROWTH PORTFOLIO

Taiwan Semiconductor rode the Computex AI tailwind as the foundry at the center of the accelerator build-out.

DVN +4.09% DIVIDEND STRATEGY

Devon advanced with the energy sleeve as Hormuz supply disruption and record May U.S. crude exports kept the oil bid firm.

VLO +3.15% DIVIDEND STRATEGY

Valero gained on the same energy backdrop, with refining margins supported by the tighter global supply picture.

DECLINERS

QCOM -8.78% DIVIDEND STRATEGY

Nvidia's RTX Spark targets the same Windows-on-Arm PC socket as Qualcomm's Snapdragon X. Paired with reports of an Arm license dispute and soft chip-peer guidance, the stock gave back part of a strong May. The decline was company-specific against an up market.

NEE -3.85% DIVIDEND STRATEGY

NextEra eased as the firm ISM print and intact no-cuts read pressured rate-sensitive utilities.

HOOD -3.79% GROWTH PORTFOLIO

Robinhood pulled back after its strong May run, tracking the softer crypto tape.

AEM -3.59% GROWTH PORTFOLIO

Agnico Eagle declined alongside gold, which fell 1.74% on the day as risk appetite favored equities.

VST -3.41%

GROWTH PORTFOLIO

Vistra slipped as power and AI-infrastructure names took a breather after their recent leadership.

COIN -3.40%

GROWTH PORTFOLIO

Coinbase tracked Bitcoin lower, with the digital-asset complex softer across the session.

LMT -2.63%

DIVIDEND STRATEGY

Lockheed Martin retraced modestly as defense names cooled into the day's risk-on rotation.

HOLDINGS NEWS

Credo (Growth Portfolio) reports fiscal Q4 after today's close. Shares eased 4.21% into the print as positioning de-risked; consensus sits near \$1.03 in EPS on roughly \$433 million in revenue. The report is the first supplier-side read on whether the AI-server backlog is translating into connectivity-layer fundamentals. We will assess the guide rather than the headline.

Qualcomm (Dividend Strategy) introduced its Dragonfly data-center brand at Computex, with further detail reserved for its June 24 Investor Day. The disclosure was overshadowed by Nvidia's PC reveal, but it signals continued intent to diversify beyond handsets and into AI infrastructure.

-0.54%

vs. DVY -0.81% | SPY +0.27%

GROWTH PORTFOLIO

✗ TRAIL

+0.57%

vs. IUSG +0.87%

YEAR-TO-DATE

Dividend +12.89% vs DVY +8.91% / SPY +11.24%

Growth +17.90% vs IUSG +15.09%

The Dividend Strategy held up better than its income peer on a day built for defensives to lag, easing 0.54% against DVY's 0.81% decline while trailing the cap-weighted S&P. The Growth Portfolio gained 0.57%, participating in the advance but lagging IUSG, whose mega-cap concentration captured more of the day's narrow leadership. Year-to-date, both sleeves remain ahead of their benchmarks: Dividend at +12.89% versus DVY +8.91% and the S&P +11.24%, and Growth at +17.90% versus IUSG +15.09%.
